## Professional Summary

Results-driven Full Stack Software Developer with 1.5 years of experience in developing scalable web applications. Demonstrated expertise in reducing application processing time by 60% and improving system scalability by 50% through microservices architecture. Proven track record of implementing secure authentication systems and optimizing application performance, resulting in 40% faster load times and 95% reduction in security incidents.

## Professional Experience

### Mamo Technolabs

March 2025 – Present

Full Stack Developer

Remote

- Developing **Zodiya**, a Next.js and React.js-based astrology prediction platform with dynamic content updates and personalized experiences.
- Building **Buzzingo**, a MERN-based IQ and brain testing platform with interactive games, real-time scoring, and analytics.
- Engineered a **real-time analytics dashboard** using WebSocket technology and Redis caching, reducing processing time by 60%.

### Great Hire

November 2024 – February 2025

Full Stack Developer

Remote

- Developed an enterprise job portal using React.js, Node.js, and MongoDB, increasing user engagement by 40%.
- Implemented real-time analytics with WebSockets and Redis, cutting processing time by 60%.
- Led a team of 4 developers for developing greathire from scratch.

### Optimanager Software

May 2024 – October 2024

Full Stack Developer

Remote

- Developed 3 large-scale MERN stack applications, including a healthcare platform and CRM system for 100+ users.
- Implemented JWT authentication and role-based access control, reducing security risks by 95%.
- Optimized MongoDB queries and Redis caching, reducing API response time by 40%.

## Technical Skills

**Frontend:** React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Webpack

**Backend:** Node.js, Express.js, Python, Django, REST APIs

**Databases & Caching:** MongoDB, MySQL, Redis

**Cloud:** AWS EC2

**Tools & Testing:** Git, GitHub Actions, Postman

## Key Projects

### Professional Portfolio Website | GitHub

- Developed a modern and responsive portfolio website using React.js and Tailwind CSS.
- Integrated dynamic project showcases and smooth scrolling for better user experience.
- Designed and developed a sleek and interactive portfolio website to highlight projects, skills, and professional achievements. Features include a visually appealing UI, smooth transitions, and optimized performance for a seamless user experience across all devices.

### Health Advisory Platform | GitHub

- Engineered full-stack health advisory platform using MongoDB, Express.js, React.js, and Node.js.
- Developed real-time health monitoring dashboard and BMI calculator with 98% accuracy and uptime
- Integrated machine learning algorithms using TensorFlow.js for personalized health recommendations, increasing user retention by 45%

**Employee Review System | GitHub**

- Built enterprise-grade performance review system using MongoDB, Express.js, React.js, and Node.js with JWT authentication
- Implemented role-based access control and data encryption using bcrypt, ensuring GDPR compliance and 100% data privacy
- Developed automated email notification system using NodeMailer, achieving 99% delivery success rate

**Education**

|   |                                  |
|---|----------------------------------|
| <b>Gyan Ganga College of Technology</b>                           | <b>August 2019 – August 2023</b> |
| <i>Bachelor of Technology in Computer Science and Engineering</i> | <i>CGPA: 8.48/10.0</i>           |

**Certifications and Trainings**

|  |                            |
|--|----------------------------|
| <b>Coding Ninjas</b>                         | <b>OCT 2022 – AUG 2023</b> |
| <i>Full Stack Web Development</i>            |                            |
| • Backend   Frontend   Java   Data Structure |                            |
